Allworx Certified for SIP Print Call Recording

08/10/2009

SIP Print announced Monday that two IP-based phone systems from Allworx successfully completed interoperability testing with SIP Print's call recording solutions for IP-based phone systems.

Allworx, a wholly owned subsidiary of PAETEC Holding Corp., develops phone and network systems for small-to-medium sized businesses through a network of authorized resellers. Designed for companies with up to 60 users, the Allworx 6x system is an all-in-one communication system integrating a phone system, advanced IP phones and productivity features. The Allworx 24x supports up to 150 users and also offers integrated T1/PRI capability.

SIP Print's SIP/VoIP call recording is designed for businesses with up to 200 seats per location. SIP call recording systems are SIP 2.0- and CALEA-compliant, and are available through distributors, resellers and OEMs worldwide.
