SIP Print, Zultys Partner To Push Bundled UC Solutions

05/04/2009

SIP Print and Zultys Inc. have announced a partnership under which the companies will collaborate to offer a bundled unified communications solution to SMBs. The companies also announced they have successfully completed joint interoperability testing between SIP Print's SIP call recording appliances and Zultys' lineup of SIP-based IP PBX communications systems.

The Zultys suite of IP PBX appliances includes advanced features that allow SMBs to compete with larger companies. SIP Print's VoIP call recording appliances are also geared for SMBs, with a complete focus on solutions that are easy to install, easy to use and maintain, and easy to afford.

"This partnership is founded on a mutual commitment to open standards, the SIP protocol, and to bringing feature-rich yet affordable communications solutions to the SMB market," said Steve Rothenberg, CEO of Zultys. "We believe these values are critical to the customers of both SIP Print and Zultys, and we look forward to introducing this bundled solution to that audience."

HD Speech: Enhancing VoIP across all networks
 Differentiate your VoIP service offering through greatly improved quality, better sense of presence and intelligibility. And more importantly, ensure you are not losing that benefit by using a fully interoperable wideband codec across broadband, wireless, wi-fi and cable networks based on ITU, 3GPP, 3GPP2 and CableLabs recommended standards.
