

ADTRAN Alliance Partner IP Telephony Solutions Overview

ADTRAN NetVanta 7000 Series IP PBX and the SIP Print Call Recording System

ADTRAN's Alliance Program is a collaboration between ADTRAN® and best-in-breed technology and service providers that complement the NetVanta® 7000 converged IP PBX Series. Members of the alliance have successfully completed interoperability testing of their complementary services or solutions with ADTRAN's NetVanta 7000 Series IP PBX platforms. These complementary partner solutions now enable service and solutions providers to offer a broader, more comprehensive solution with the added benefit of proven interoperability to meet the growing needs of Small and Medium-sized Businesses (SMBs) .

IP Telephony Featured Technology Partner – SIP Print

Now every business can afford to record their mission-critical business calls with the industry's most advanced yet affordable voice recording appliances for SMB. SIP Print delivers truly superior, full-featured, SIP-compliant recording appliances at a price that is a fraction of the cost of legacy analog recording systems.

Benefits for SMBs

Thanks to SIP Print's breakthrough design and patent-pending technology, state-of-the-art Voice over IP (VoIP) voice recording is now within reach of virtually any organization with a need to record up to 200 seats per location. Now, SMBs with one or more office locations can easily justify the investment in advanced recording capabilities to satisfy compliance requirements and take their security and customer service operations to a new level of professionalism and productivity.

Advantage for IPT Partners

Utilizing the SIP Print call recording solution with the NetVanta 7000 Series IP PBX provides end users with a powerful platform to compete and improve performance while maintaining compliance with stringent laws and regulations.

In the past, large enterprises could generally afford the technologies to meet their call recording needs, but smaller organizations were shut out of the market. Now, SIP Print and the ADTRAN NetVanta 7000 IP PBX offer every business a world-class, affordable solution.

About SIP Print

SIP Print redefines VoIP call recording with systems tailored to the needs of businesses with 20-200 seats per location. SIP Print's appliances are the industry's first truly affordable systems featuring easy installation, simple maintenance and operation, and scalability to support the expansion of high-growth SMBs.

SIP Print Inc. was formed to address the underserved SMB market for affordable telephony applications. Many of the call center and customer service applications today have been engineered and designed for the medium-to-large enterprise, therefore making the cost-per-seat for small businesses a prohibitive expensive. In the case of call recording, a business requiring 20-30 users would commonly pay more for the call recording system than their PBX phone system.
